KICK.IO A First-rate Decentralized Fundraising Platform
Built on the Cardano Network
Introduction

**KICK.IO** is a Cardano-based fundraising platform and a project accelerator, designed to leverage DeFi innovations to provide transparent, efficient, and fully decentralized crowdfunding services. Unlike our competitors, we offer full support of Cardano native tokens and a suite of advanced DeFi tools that upcoming projects need to thrive and prosper.

KICK.IO is set to become an integral part of the Cardano ecosystem, which was founded by Charles Hoskinson, a co-founder of Ethereum, and is already widely anticipated to soon overtake Ethereum in terms of network transactions. As soon as it launches smart contract support (scheduled for Q3, 2021), Cardano will offer technologically and financially superior DeFi protocols that are likely to make it the next go-to destination for all market participants.

Once DeFi dinosaurs are driven to extinction, KICK.IO is set to mature into the cornerstone of the new Cardano-dominated DeFi landscape. KICK.IO will become the place where Cardano’s extensive community can come together to fund high-growth projects characterized by immense potential for future success.
Led by a team of DeFi and traditional finance professionals, KICK.IO is set to implement market-leading capabilities tailored for Cardano-based projects and the ecosystem’s users. As a proof of concept, we have already developed a centralized solution. Our next-generation decentralized launchpad will be built according to the best DeFi industry practices, ensuring real-time settlement, top-notch security, interoperability, true decentralization, zero counterparty risk, while also being fully scalable to meet the needs of institutional investors.

Unlike KICK.IO, other existing Cardano IDO launchpads do not support native Cardano tokens. In what amounts to a major disappointment to the devoted community, most launchpads neglect non-ERC20 type tokens. KICK.IO, meanwhile, offers full Cardano native token support as well as a suite of project kickstarting and endorsement capabilities all modern projects need.

For our users, we also provide staking functionality and up to 5% additional return on endorsed projects. Users are invited to browse through our verified project listings, meet project founders, and endorse the most credible ones. The credibility of projects is vetted by well-informed investors, as well as the platform’s due diligence team before the propositions are released to our users. KICK.IO seeks to ensure cost-effective and timely fundraising for projects, lending legitimacy and credibility to their future success. In looking out for the interests of our investors, KICK.IO ensures that only the most credible and promising projects make it through — the ones with the highest potential to make a meaningful contribution to the Cardano ecosystem.
Everything we do is governed by a philosophy of decentralization — funds raised are distributed directly to projects, tokens purchased are sent directly to the personal wallets of users without burdensome checks or unnecessary delay. We also take financial sustainability and inclusion seriously, working diligently to ensure that our efforts benefit all stakeholders, helping to evolve the reputation and maturity of the DeFi industry.

Be among the first contributors to the most promising crypto & blockchain projects

Live up to the hype of being an early investor to a unicorn-level project. Browse KICK.IO IDO Launchpad, locate the best new upcoming startups and get in early. Only the carefully handpicked projects will be hosted. The earlier you can jump in, the higher is the potential reward. Other platforms tend to list projects and their native tokens after the initial rounds have been completed.
KICK.IO invites our members to join early and reap the associated high-grossing benefits in the future. Funding your project and securing running funds is one of the hardest barriers one must face as an entrepreneur. Meanwhile, staying safe, avoiding scams, and phishing attempts are some of the most frequently occurring problems cryptocurrency investors must overcome. Luckily, KICK.IO IDO Launchpad solves all of that and is a natural development of the crypto fundraising process. The structure follows a similar pattern to the IEO. Yet the key difference is that both the entrepreneur and the investors conduct their transactions through a third-party decentralized platform.

There are numerous securities of funds, project awareness, fraud prevention and immediate token listing benefits associated with conducting an IDO instead of an ICO - and project owners are seeing them clearly. Internal due diligence department will carefully select the most promising and legitimate start-ups looking for financing. KICK.IO will host the IDO of these projects to keep providing its community with the best deals in the market. KICK.IO is eagerly collaborating with start-up incubators and accelerator hubs as well as always keeping open ears to its partner and community network. The end goal is to identify and contact new companies with the highest upside potential within the Cardano Ecosystem. KICK.IO is going to host both utility and security token IDOs. Besides the most popular payment methods of ADA, ETH and supported stable coins, KICK.IO will allow IDO contributions in native KICK token at a priority which will add a supplementary utility for the token.
Cardano Native Tokens
Become one of the early birds within the Cardano Ecosystem

Project Endorsements
Ability to support your favorite projects and gain rewards

Private / Public sale options
Facilitate various types of fundraising phases

Automated Distribution
Parties can access both the funds and the assets instantaneously
Fees

Project is receiving 92.5% of funds, the remaining 7.5% are allocated for:

- 5% Endorsement rewards
- 2.5% Platform Commission fee

Endorsement Rewards Model

How does it work?

KICK token holders are enabled to endorse any of the new projects that are live on the IDO launchpad. Meaning that it is a similar solution to staking. KICK Token holders, after endorsing a project are eligible to receive an equivalent stake of the endorsement reward.

The size of the stake is determined by the amount of KICK Token allocated. Rewards are paid out after each investment transaction that the project receives.
2021

Q3
- Project Kick-off
- Extensive Marketing Campaign
- Cardano Native Token Minting
- Fundraising Phase
- Token Listing on Exchanges
- Centralized version Launch (Early Revenue Stream)

Q4
- Cardano Smart Contracts Release
- Decentralization of the Launchpad
- Project Endorsement Engine Deployment

2022

Q1
- Cross Chain Support
- Implementation of ERC20, BSC bridges.
- Staking Engine Development

Q2
- Cardano Light Version DEX Development

Q3
- Addition of multiple wallets support
- Cardano Light Version DEX Launch

Q4
- Additional features
Token Type:
Cardano Native Token
